

**To whom it may concern,**

We'd first like to thank you for your continuing patronage of Techwise tech products and services. We would like to take this time to make our customers aware of infringement designs upon our product line, by copycat electronic firms based in china mainland.

It has come to our attention that there are currently several china mainland firms, advertising, or offering for sale sub-standard Cellular Network jammers, based on our product design and appearances.

**Here are the compares of our PCB-1000 with fake from CHINA.**

- ◆ Almost the same appearance

Fake

PCB-1000

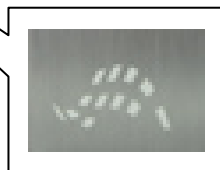

Front Side

Fake

PCB-1000

Back Side

- ◆ Totally different design

**Open vision**

**Fake**  
Aspirate designP

**PCB-1000**  
Formal design

◆ Capacity compare

	Fake	PCB-1000
Battery	Made in China	Made in Germany - <b>Varta</b>
Battery using time	About 80 mins	> 100 mins
Charging time	> 5 hours	< 3 hours
LED indicator	No battery full LED indicator and charging circuit protect, battery is easy to damage	With battery full LED indicator and charging protect circuit design.
Jamming frequencies	AMPS, N-AMPS, NMT, TACS, GSM, CDMA, TDMA, IDEN <b>UMTS</b>	AMPS, N-AMPS, NMT, TACS, GSM, CDMA, TDMA, IDEN, UMTS
Modulating frequency	Traditional R.C circuit. Frequency shift easily occurred by temperature issue.	PLL design. Frequency is very stable
Power adaptor	When power consumed, the instant charging current > DC adapter output current rating . Easy to damage	Charging current always within DC adapter output current.
Jamming effect	fair	Double jamming distance

Please be aware that Techwise only uses quality, precision manufactured housings, Taiwanese manufacture PCB boards, and imported components from the United States, Germany, Netherlands, Denmark, and France for the construction and assembly of all our Cellular Network / RF Jammers.

We would like to ensure that our customers won't make the mistake and confuse Techwise tech QC/Manufacturing standards to copycat China versions.
